Soil Warrior by Environmental Tillage Systems

TIRED OF cobbling together tillage and fertilizer units for one-pass work in the fall and spring, Minnesota farmer Mark Bauer designed his own tillage/fertilizer unit. Today his machine, called the Soil Warrior, and his company, Environmental Tillage Systems, have developed a big following among crop farmers.

The Soil Warrior tills in a 10-in.-wide zone that is 8 to 12 in. deep for the fall and only 2 to 6 in. deep for spring. It is built to Bauer's farmer specifications for durability, ease of use, and one-pass tillage and fertilizing.

The price for an 8-row Soil Warrior is about \$115,000. Bauer and ETS are developing other products like a Seed Warrior for planting. Call Environmental Tillage Systems at 507/332-2231, visit soilwarrior.com or www.freeproductinfo.net/fin, or circle 113.

New Holland BB90000 series large square balers

16 NEW HOLLAND drew in the votes for its BB9000 series large square balers, which have a bale density that is 5% better than New Holland's previous series of large square balers. Modifications include larger bale density cylinders; a new door balancer; a longer, lower bale chamber floor; and improved top-fill of the bale. Updated density software provides smoother feeding of flakes and better density control.

Suggested list prices: 3 x 3, \$91,000; 3 x 4, \$136,000. For more information, visit your New Holland dealer, visit www.newholland.com/na or www.freeproductinfo.net/fin, or circle 114. >
